- Wide PC style keyboard
- Automatic label cutter
- Built-in editable label designs for common labelling applications
- Prints 3.5, 6, 9, 12, 18 and 24mm labels

www.brother.co.uk

“The large colour LCD display makes it easy to design and preview my labels before printing. An automatic cutter, easy-to-type keyboard and high speed printing plus the ability to print labels from my PC or Mac ensures I keep my office organised through clear identification of important items.”

The professional stand-alone and PC connectable labelling machine

The P-touch D600VP creates durable fade-proof labels by using the easy-to-use integrated labelling functions, or directly from your PC or Mac thanks to the fully-featured P-touch Editor label design software.

A large colour LCD display with label preview function, and a wide PC-style keyboard make it easy to quickly produce your labels in various colour and size combinations.

Alternatively, connect to your PC or Mac and be creative by using various fonts, text styles, images and frames on your label design. You can even link to text contained in a Microsoft Excel spreadsheet to quickly print many labels at once, thanks to its high-speed print capabilities and fully automatic cutter.

* LR6/HR6. Batteries not supplied.

P-touch laminated labels – designed to last

Brother P-touch laminated TZe tapes consist of six layers of materials, resulting in a thin yet extremely strong label. The thermal transfer ink is sandwiched between two protective layers of PET(polyester film), which protects the text against the effects of liquids, abrasion, temperature, chemicals and sunlight. As the labels have been tested to the extreme, you can be confident of a professional quality label that has been designed to last.
